PURE MOLYBDENUM PDMP
Powder (99.95 %)

Description of Product
This specification covers a plasma densified pure molybdenum powder designed for thermal spray applications. The particles are melted to achieve near theoretical density and spherical shape. This powder is free flowing for applications requiring high coating densities. The powder is produced in both a coarse and fine grade.

Chemical Characteristics
(Mass fraction in % [cg/g]; ppm [µg/g])

Mo (excluding gases) min. 99.5 %

Physical Characteristics
Bulk Density (Scott) min. 80 g/inch³
Hall Flow (coarse grade) max. 15 sec./50 g

1) Information on testing methods on request.

1/2
Packaging

The molybdenum powder is shipped in non-returnable polyethylene-lined 5-gallon plastic pails or 15-gallon steel drums. Special packaging inquiries welcome.

Storage and Handling

Storage and handling are subject to the rules and regulations in the country of use.

none.
